## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, 16-24, and 28-37, drawn to execution of a voice application specified by an XML control parameter document, classified in class 704 (Data Processing: Speech Signal Processing...), subclass 260 (Image to Speech (*or text to speech*)).
  - II. Claims 11-15, 25-27, and 38-42, drawn to generating an XML event log document, classified in class 715 (Data Processing: Presentation Processing of Document), subclass 513 (Structured Document (E.G., HTML, SGML, ODA, CDA)).
2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as creating an application processing event log from many networked applications, including e-mail applications, online shopping applications or world wide web search tool applications. See MPEP § 806.05(d).

Art Unit: 2178

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(1).
